

ESTRUSIONE PROFILI TECNOPLASTICI E APPLICAZIONE ADESIVI

ELSA S.R.L.

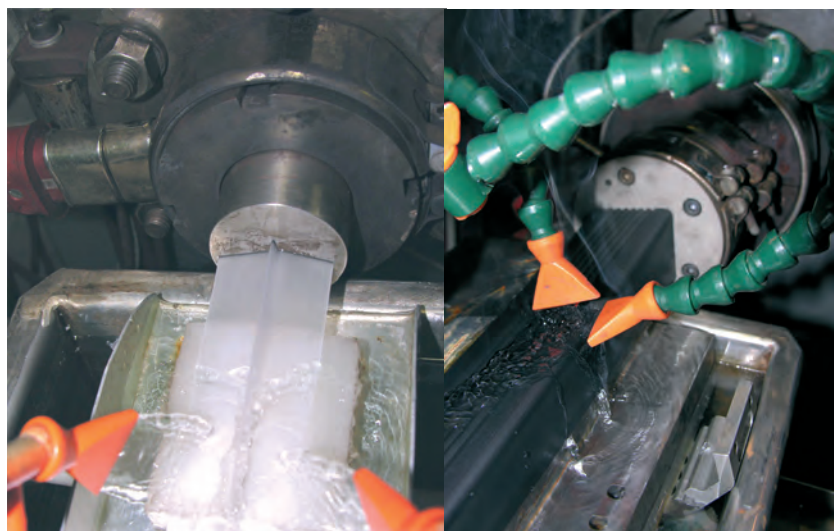

La nostra azienda, operante nel settore della produzione per estrusione di profilati tecnoplastici, assemblaggi tecnici, meccanici ed elettrici in genere e lavorazioni su profili in gomma, vanta una ampia specializzazione derivata da una esperienza consolidata nell'arco di oltre un decennio di attività. Nata nel 1997 ha sempre adottato una politica rivolta al miglioramento costante nel settore artigiano ed in modo particolare alla ricerca del massimo della qualità utilizzando soluzioni sempre al passo con le esigenze di mercato. Questa politica ci ha portato ad utilizzare nuovi locali atti a inserire altre due linee complete per la produzione di tecnoplastici. Inoltre da gennaio 2011 si è operato l'unione tra la soc. EL-SA e la soc. C.ALBICOCCO.

Questo sodalizio ci permette di ampliare considerevolmente la gamma dei prodotti trattati.

Infatti la ditta ALBICOCCO, nata nel 1922 vanta una notevole esperienza nel settore di tutti i prodotti tecnici in gomma e derivati, spaziando dai tubi flessibili alle lastre, profili, antivibranti, nastri adesivi, guarnizioni e prodotti vari.

Sempre a Vostra disposizione per ulteriori informazioni tecniche, Vi invitiamo a visitare la nostra sede.

ELSA S.R.L.

C Albicocco

LE NOSTRE LAVORAZIONI

Estrusione e coestrusione di materiali plastici ed elastomeri termoplastici

Coestrusione di profili armati con inserti metallici

Applicazione di sigillanti butilici

Applicazione di collanti termofusibili (hot melt) sia spalmati sia estrusi in rotoli

Applicazione di biadesivi con tecnologia termo attivabile

Lavorazioni speciali di fustellatura

Trattamenti di verniciatura

Applicazione di floccatura

Tagli e giunzioni ad anello

Progettazione e realizzazione attrezzature di estrusione e stampaggio di prodotti specifici su richiesta del Cliente

OUR WORKS

Extrusion et coextrusion of plastic and thermoplastic materials

Coextrusion of plastic profiles with metallic insert

Application of butileuyc seals

Thermoplastic adhesive application (hot melt) coated or extruded in roll

Application of both sides adhesive tapes, with thermic activated technology

Any kind of special dinking work

Varnishing treatment

Floc application

Cuts and ring joints

Design and realization of equipment for extrusion and molding customized on request, for any customer needs

NOS PROCEDES

Extrusion et coextrusion de matériaux plastiques et élastomères thermoplastiques

Coextrusion del profilés avec insert métallique

Application de mastics botuliques

Application de adhésifs thermo-fusibles (hot melt) soit étalés soit extrudés en rouleaux

Application de bi-adhésifs avec technologie thermo-activable

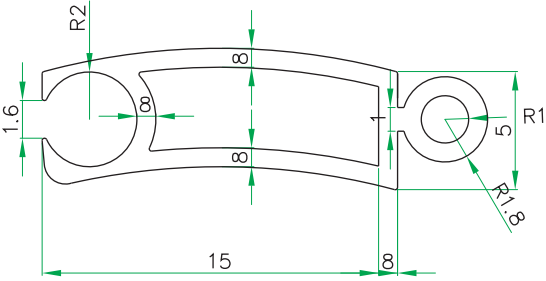

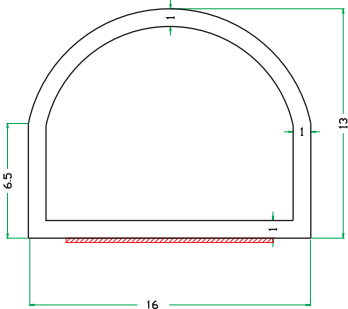

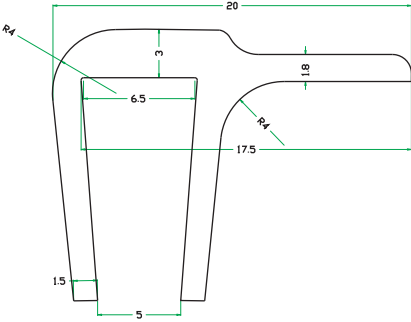

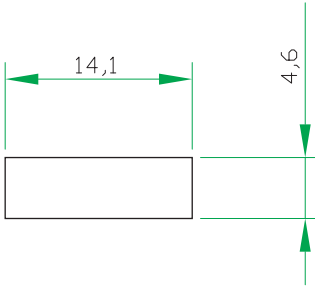

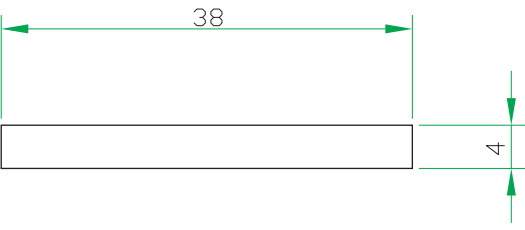

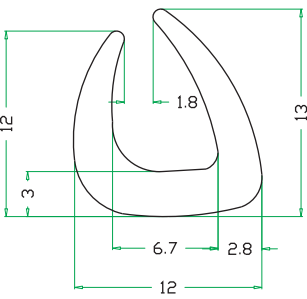

Travaux spéciaux d'estampage

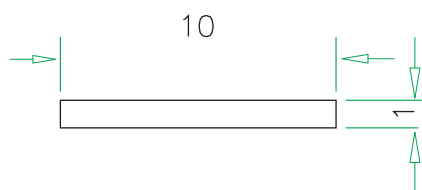

Traitements de peinture

Flocages

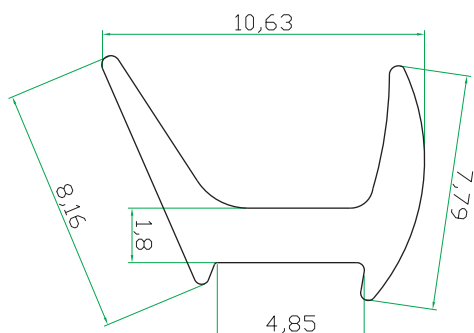

Coupes à jonction par anneau

Nous étudions et réalisons des équipements pou l'extrusion et le moulage des matieres plastiques "sur mesure" à la demande du client
